EDUCATION

Indian Institute of Information Technology (IIIT), Dharwad	2020-2024
Bachelor of Technology [Computer Science & Engineering (CSE)]: 7.52/10.0	
XII Standard (CBSE): 95.2%	2018-2019
X Standard (CBSE): 9.6/10.0	2016-2017

SKILLS

Programming Languages: C/C++ (OOP), JavaScript, Python	Tools: Postman, Git, Figma, Agile Development, SDLC
Backend: Node.js, Express.js, Firebase, EJS, JWT, Passport.js, Zod	Databases: MySQL, NoSQL (MongoDB, Firestore)
Frontend: HTML, XML, CSS, Javascript, React.js, Redux, TypeScript, Next.js, Bootstrap, Tailwind CSS, Sass/SCSS, Mantine	

WORK EXPERIENCE

BrightR Web Developer (Full Time)	Sep 2024 - Present
- Revamped the company website towards a fresh look using React, Tailwind CSS, and Redux Toolkit. - Implemented API integrations & redesigns to improve site functionality and user experience across multiple platforms, including customer, admin and delivery side applications.	
AI Art War Full Stack Engineer (Contractual)	Jul 2024 - Sep 2024
- Developed the company website with MERN stack and Next.js for server-side rendering and static site generation. - Integrated Stripe for secure payments, Tailwind CSS for responsive UI, and implemented user authentication (using JWT for Token Management, Zod for form validation, and Resend for email verification) & API integrations.	
TechOn Pixel React Developer (Internship)	June 2024 - July 2024
- Contributed to the development of National People's Party (NPP)'s official website using Next.js and TypeScript. - Translated Figma designs into interactive UI components using Mantine & SCSS/Sass on company & client applications.	

PROJECTS

Gitfolio Tracker Github Live	Full Stack Project
- Developed a full stack application (MERN Stack, Tailwind CSS, flowbite, & react-hot-toast), with Passport.js for secure Session Management, that incorporates GitHub API for user to explore, authenticate & manage profiles and repos. - Enabled various features such as 'Like Profile', 'Search Users', 'Explore Popular Repositories in various languages', 'Sort Repositories by Date, Stars, Forks'.	
Real-Time Chat Application Github Live	Full Stack Project
- Leveraged Firebase to attain a fluid backend workflow, employing Firestore Database for secure data storage. - Designed the frontend using React.js, crafting an intuitive and user-centric interface with CSS3. - Incorporated features such as User Authentication, Email OTP Verification using EmailJS, and Multimedia Message Support, enabling users to exchange image/video messages and voice notes.	
Credit Card Fraud Detection System Github Colab	Machine Learning Project
- Applied Logistic Regression to build a credit card fraud detection system in Python using a dataset spanning 48 hours of transaction history, and achieved an accuracy rate of over 94% on training data and over 95% on test data. - Preprocessed data by performing data normalization and studying correlation & distribution using libraries like NumPy, Pandas, Matplotlib & Seaborn - revealing a highly unbalanced dataset of 99.8% legitimate transactions. - Employed undersampling to handle dataset imbalance and used Grid Search for Hyperparameter Tuning.	
Other Projects	Web Development Projects
Front End: Personal Portfolio Website Github Live	Text Utility Application Github Live
E-Commerce Store Github Live	Wellness Retreat Github Live
Full Stack: Recipe Sharing Platform (MERN) Github Live	Back End: URL Shortener Application Github

CERTIFICATES & ACHIEVEMENTS

- [Deloitte Job Simulation](#): Data Processing, Tableau Dashboard, Client Project Proposal Writing, Security Log Inspection
- [Career Essentials in Generative AI by Microsoft & LinkedIn](#): Generative AI, applications, and ethics
- 400+** DSA Problems across platforms, **Top 1.3%** in Job-A-Thon 33 among **4000** participants & **1636** rating on CodeChef
